

Not all Internet pharmacies are created equal.

Some aren't even pharmacies.

Many Internet sites that sell medicine are not legitimate pharmacies. Make sure a Web site is a state-licensed pharmacy. Find your state's contact information from the National Association of Boards of Pharmacy (NABP) at www.nabp.info.

Some sites display the Seal of the Verified Internet Pharmacy Practice Sites™ (VIPPS®) Program. For a list of state-licensed pharmacies that carry the Seal, go to www.vipps.info.
